Multi-disciplinary Product Designer currently pursuing MSc in Design for Interaction (HCI specialization) . I bridge the gap between human behavior and complex systems, with a professional background in leading end-to-end product lifecycles and architecting scalable design systems. I am dedicated to crafting logic-driven interfaces for AI-integrated solutions, ensuring emerging technologies remain intuitive and human-centered while aligning seamless interaction design with strategic business growth.

EDUCATION

Delft University of Technology

Msc Design for Interaction

Sep 2025 - Present

Delft, Netherlands

Indian Institute of Technology

Bachelor of Design

July 2019 - Jun 2023

Guwahati, India

WORK EXPERIENCE

• Cloomtrack

Product Designer

Jun 2024 - Jul 2025

Delaware, USA, Remote

- End-to-End Product Ownership

Acted as a Product Manager within a lean team, overseeing the entire product lifecycle from initial discovery and documentation to final Figma prototyping and developer handoff

Collaborated with stakeholders to define project timelines, prioritize high-impact features, and manage the product backlog to ensure efficient "productization" of concepts

- Product Strategy & Design Ops

Directed the design and logic for Genie , a GPT-4o powered AI interface, while implementing a scalable Design System and documentation workflow to bridge the gap between product concept and high-quality development.

• ZEE Entertainment

Associate Product Designer

Jun 2023 - Mar 2024

Bengaluru, India

- Design System Development & Scalability

Led the development of design tokens and a comprehensive component library, ensuring cross-platform consistency across all ZEE digital products to reduce development cycles and maintain brand integrity

- GenAI Product Integration

Partnered with cross-functional teams to define the user interface and interaction logic for Gen AI projects and ILT20 Season 2, bridging the gap between emerging technology and consumer-facing applications

- System Standardization

Established documentation and governance for design components, facilitating seamless collaboration between design, product, and engineering teams for high-traffic media platforms

PROJECTS

• Milo: Breaking the Silence

Dr. Gijs Huisman, Assistant Professor, Faculty of Industrial Design Engineering (IDE), TU Delft, Netherlands.

Aug 2025 - Jan 2026

Case Study

- Built Milo, an ambient companionship device that supports students during doorway transitions by creating a “welcome home” ritual.

- Prototyped the system using Raspberry Pi and OpenAI API, triggered via a key-hanging mechanism with a screenless, non-intrusive interaction model.

- Conducted an in-situ evaluation (24–48 hours) using diary study to assess experience quality, privacy comfort, and improvement areas.

• Immersive Interfaces for Children’s Education

Prof. Shareka Iqbal, Assistant Professor, Dept. of Design, IIT Guwahati

Aug 2022 - May 2023

Bachelor’s Graduation Project

- Designed an immersive interface concept for children’s education, translating learning goals into intuitive user flows and prototypes.

- Iterated on interactions and visual design to improve engagement and ease of use for young learners.

- Delivered a refined prototype with clear documentation for presentation and future development.

• Timely: An app to make college students accountable

Jan 2022 - Apr 2022

- Designed a UX case study for Timely, a mobile app concept focused on improving accountability for college students, translating the problem into clear user journeys and core flows.

- Built and iterated Figma prototypes, refining information architecture and interaction patterns to keep the experience simple and action-oriented.

- Defined a lightweight system for planning and follow-through tasks and schedule to help students stay consistent.

SKILLS

• **Design Skills:** User Research, Journey Mapping, Low & High Fidelity Wireframing, Information Architecture, Prototyping, Motion graphics, Design tokens, Components

• **Softwares:** Figma, Adobe CC, Blender, Miro, Framer*, Webflow*, Anti Gravity*, Thonny*

*Elementary Proficiency
