Education

Indian Institute of Technology, Guwahati
Bachelor of Design

July 2019 - Jun 2023
Guwahati, Assam

Experience

Clootrack

Product Designer

Jun 2024 - Present

Remote

- Translated Product Concept from docs to Figma prototypes, driving efficient productisation and bringing ideas to life.
- Designed Genie, a GPT-4o powered chatbot empowering users to explore data through diverse avenues, reducing reliance on traditional dashboards.
- Development of a cohesive Design System to unify design language, improve handoff process, and enhance quality control efforts.

ZEE Entertainment

Associate Product Designer

Jun 2023 - Mar 2024

Bengaluru, Karnataka

- Contributed to the design system team at ZEE, focusing on essential design components.
- Ensured consistency and coherence across all ZEE products and platforms.
- Collaborated closely with the team to develop design tokens, components, and a comprehensive visual library.
- Crafted UI for Gen AI projects and ILT20 season 2.

Agrivison4U

Product Design Intern

Aug 2021- Nov 2021

Remote

- Conducted research to inform the design of the website's user interface.
- Redesigned their Website on both mobile and web platforms.
- Crafted intuitive and visually appealing UI elements aligned with the brand and target audience needs and ensured a seamless user experience.

Projects

Immersive Interfaces for Children's Education

Prof. Shareka Iqbal, Assistant Professor, Dept. of Design, IIT Guwahati

Aug 2022 - May 2023

This project explores integrating game-based learning into virtual education to create interactive and engaging experiences for children aged 4–11, making foundational learning immersive and playful. It focuses on fostering curiosity and enhancing problem-solving skills through innovative tools and technologies.

Reimagining the tools used by blind people to detect currency

Prof. Keyur Sorathia, Associate Professor, Dept. of Design, IIT Guwahati

Sep 2021 - Nov 2021

An exploratory design project that looked into the opportunities for improving the ability to detect currency notes for blind people. The process involved primary/secondary research over 4 weeks and the final concepts ranged from tangible to digital products that enable easy detection of currency notes.

Technical Skills

Design: User research , Design Systems, Design Analysis and Evaluation, Brainstorming, Concept generation,
Low / High fidelity Wire-framing, Prototyping, Story-boarding, Animation, Motion Graphics *

Softwares: Figma, Blender, Unity, Bezi, Adobe CC *

* Elementary Proficiency

Key courses

- | | | |
|---------------------------|-------------------------------|-------------------------------|
| • Interaction Design | • Principles of Visual Design | • Tangible Interfaces |
| • User Research Methods | • Animation Fundamentals | • Typography and Grid Systems |
| • Systems Approach Design | • Coursera-Google UX Design | • Design Analysis |
